Toque Pattern

There are two pattern pieces for the toque pattern, the top and the hem band. The top piece is on one page and the hem band is on two pages and will be taped together as shown below. The hem band is cut on the fold of the fabric where indicated.

Cut 4 of the top pieces and 1 of the hem band piece following the grain lines. All pieces include 1/2" seam allowance on all sides.

Sew the curved edges of two top pieces together, face to face. Do this again with the other two top pieces and then sew each set of two together along the other curved edges, face to face, to create the top part of the toque. Sew the short edges of the hem band together and then fold the hem band so the long edges are together with the face side out. Sew the long edges to the bottom of the top section of the toque, either with the edges together or with the seam allowances all inside the hem band.
