Mitts Pattern

The mitts pattern is just one piece for each mitt. There are three pages and they go together as shown below.

Cut 2 of the pattern following the grainline. It is easiest to fold the fabric and cut two at once, because they have to be a pair.

Lay one mitt piece face down, fold the thumb piece up along the fold line and fold the outer piece in toward the larger section and it will be easier to see how the mitts come together. The matching symbols on the pattern match up with each other. Sew from the star points, up along the thumb section, sewing close to the edge of the fabric at the fold line, where it lines up with the circle and then continue sewing around the top of the thumb. Next sew from the square points up along the outside edge, sewing close to the edge of the fabric at the thumb fold line and then continue sewing up and around the top of the larger finger section of the mitt. To finish the bottom edge of the mitts, turn in once by 1/2", turn in again by 1/2" and topstitch through to hem. If you want, you could add a hem band to the bottom edge instead to finish the hem and make the mitts longer.
